

MicroSnap™ | Coliform

MicroSnap™ Coliform rapidly detects and enumerates Coliform bacteria. Single figure organisms can be detected in 8 hours, delivering results in the same working day or shift.

Benefits:

- 6-hour quantitative results (CFU counts)
- 8-hour presence/absence results
- Broad CFU detection range (10 – 10,000 CFU) means fewer dilutions and less sample prep saving time and money
- Suitable for product or environmental samples
- Pass/Fail result at required detection levels are easy to understand
- Uses common microbiology sample preparation for product samples
- Same day results allow for timely corrective action
- In-house testing reduces costs from outside lab fees
- Built-in swab facilitates easy environmental testing
- AOAC Research Institute Performance Tested MethodSM (#071302)
- 12-month shelf life at refrigerated temperature (2 – 8 °C)

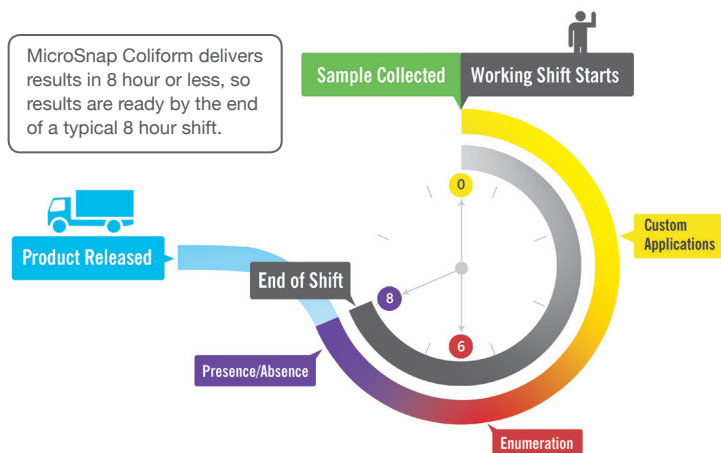

Sensitivity & Specificity:

- Detects down to <10 CFU in 8 hours
- Detects Coliform bacteria including *Escherichia*, *Klebsiella*, *Citrobacter*, and *Enterobacteria*

CFU : RLU - Conversion

CFU/ml or g	Coliform
<10	<2
<20	<4
<50	<7
<100	<12
<200	<20
<500	<35
<1,000	<60
<5,000	<180
<10,000	<300

MicroSnap Coliform delivers results in 8 hour or less, so results are ready by the end of a typical 8 hour shift.

Catalog No.

Description

Quantity

MS1-CEC	MicroSnap™ Coliform & <i>E. coli</i> Enrichment Device	100
MS1-CEC-BROTH-2ML	MicroSnap™ Coliform & <i>E. coli</i> Enrichment Broth 2mL	100
MS2-COLIFORM	MicroSnap™ Coliform Detection Device	100

Related Products

EnSURE™ Monitoring System

EnSURE™ is a high-sensitivity luminometer that measures multiple quality tests such as ATP, EB, Total, Coliform, *E. coli*, and more. The system includes SureTrend software to record, trend and analyze test results.

Bax® System Instruments

The Bax® System harnesses the power of the polymerase chain reaction (PCR) to specifically identify common food-borne pathogens. Two systems—the X5 and Q7—let you choose endpoint, real-time and other assays, and get reliable answers quickly and easily.

MicroSnap *E. coli*

MicroSnap *E. coli* detects and enumerates *E. coli* bacteria. Results are available in 8 hours or less. MicroSnap *E. coli* detects down to 1-10 CFU.

MicroSnap Total

MicroSnap Total delivers total viable organism test results in 7 hours. MicroSnap Total detects down to <10 CFU of Gram positive and Gram negative aerobic and facultative anaerobic bacteria.

MicroSnap EB (Enterobacteriaceae)

MicroSnap EB delivers test results in 6-8 hours. MicroSnap EB detects down to 50 CFU.
